CUSTOMER FOCUS

At TCS, we make the normal business transactions feel effortless. Our entire organization is dedicated to providing the right solution, on time, every time.

QUALITY

TCS ensures each piece of technology that leaves our building adheres to strict quality standards. We employ quality managers tasked with proactively identifying and resolving quality concerns.

INNOVATION

TCS believes in supporting their customers, not only today, but well into the future. That's why we annually invest significant resources into R&D, facilities, and quality control.

TCSHUB

Take your delivery management to the next level!

SAVE TIME AND IMPROVE ACCURACY

With **TCSHUB** you can centrally manage delivery information of multiple locations along with all the trucks from the home office.

Email delivery ticket information to the relevant individuals by account, location, and truck. Status delivery screen will provide up-to-date information for each delivery truck, meter totals reading, and communication status. A quick map link is available to quickly locate vehicles equipped with GPS.

TCSHUB can be configured to match your business's needs:

- Choose how frequently to pull information from the truck.
- Configure each truck to either a wireless or cellular modem.
- Identify trucks and communicate with them via TCP/IP.
- Track multiple Registers/ Meters per truck.

LEVERAGE THE LATEST TECHNOLOGY

The **TCSHUB** is a SQL-based software designed to capture truck delivery information wirelessly to be electronically collected at locations and/or the home office.

The **TCSHUB** software supports both line of sight wireless modem and/or cellular modem for **real-time delivery tracking**.

- Access **TCSHUB** Anywhere with an Internet Connection
- Easy to Administer
- Scalable
- Secure User Authentication
- Optional GPS Tracking
- Delivery Reporting
- Multi-Language Capable
- Multi-Location Centralized software

ACCESS THE DELIVERY INFORMATION YOU NEED INSTANTLY

With the **TCSHUB**, a PDF copy of the **ACTUAL** delivery ticket is available for viewing or printing **ANYTIME**. Fuel Delivery Tickets can be viewed, created, or edited from **TCSHUB** in the event errors were made. Original & edited copies of all fuel delivery tickets are archived for audit trail. Additionally editable custom fields are available for more information tracking.

- Delivery reports are available for viewing, printing, PDF and/or Excel.
- The **TCSHUB** comes with a built-in data export/import routine to assist in sending and receiving data to and from your back office or accounting software automatically.
- Multiple types of export formats are available including XML, CSV, SQL, MySQL, SQLite, MS Access.

TCSHUB can be deployed on the cloud. This means you can access all your delivery information in real-time **ANYWHERE**, on **ANY DEVICE** with an Internet connection!
