

TECHNICAL DATA

1500 SERIES 1.5 HP VISCOSITY INDEX

Viscosities can be related horizontally only. For example, the following oils have similar viscosities: ISO 460, AGMA 7 and SAE GEAR OIL 140.

The viscosity/temperature relationships are based on 95 VI oils and are usable only for straight grade engine oils, gear oils, or other 95 VI oils.

Crankcase oils and gear oils are based on 100°C viscosity. The "W" grades are classified on low temperature properties but must have a minimum viscosities as shown.

ISO oils and AGMA grades are based on 40°C viscosity.

The information is based on data from many sources and is only an approximate. It's intent is for use with Dixon Pumps product selection only.

Viscosity index for the 1.5 horse power 1.5 inch 1500 Series Blade Master Pump. Use this as basic guide for selecting the right Blade Master for the viscosity of the product being pumped. For more information please contact your distributor or Dixon Pumps Sales/Technical Team.

For more information you can visit our web site at www.dixonpumps.com. Here you can also use our innovative "Product Wizard" to determine the pump best fitting your application.
